metrofile CLOUD

Microsoft365 Backup

Metrofile Cloud Microsoft365 is designed to safeguard your Microsoft365 data from adverse instances such as accidental deletion, malevolent employees, or ransomware attacks. Our solution functions in synergy with file synchronisation applications like Sharepoint, enabling you to maximize the benefits of applications on-the-go, while being confident in your capacity to recover otherwise irretrievable data.

Why Do You Need To Backup Microsoft 365 Data?

In the era of cloud solutions, the ability to access your data anyplace and anytime is compelling. For instance, uploading a document to Microsoft SharePoint allows global colleagues to provide feedback or make edits remotely. While this ease of access facilitates team collaboration, data security is a constant concern for IT professionals and business managers.

Risk of data loss is very real, whether from a single mistakenly deleted email, a folder maliciously emptied by a rogue employee during a merger or an acquisition, or a full-blown ransomware attack disrupting the routine operation. The absence of a third-party backup solution compromises your data security, making it only a matter of time before you experience a data disaster with critical documents or emails being irretrievably corrupted or lost.

What do we safeguard?

Metrofile Cloud Microsoft365 Backup is committed to securing Microsoft 365 applications and data. It ensures total recoverability of your data at any point in time and generates 'tamper-proof' copies of vital data. Microsoft's responsibility lies in service uptime and reliability, but your Microsoft 365 data is your responsibility. Our solution, which safeguards your cloud application data and on-premise data, helps prevent your business from falling prey to costly data protection management mishaps.

What does Metrofile Cloud M365 Protection Offer?

- Backup for Microsoft Exchange Online.
- Backup for Microsoft OneDrive for Business.
- Backup for Microsoft SharePoint Online.
- Backup for Microsoft Teams (including call protection).
- Direct cloud storage backup from Microsoft data centres.

- Automatic protection for new Microsoft 365 users, groups, and sites.
- Advanced search through Microsoft 365 backups to quickly access backed-up data.

Why use our solution?

No Limits: There is no limit to the volume of backups or retention time meaning you don't have to worry about the Microsoft365 data expiration limit.

Fully Restorable: Restores can be conducted at the file, folder, or mailbox level and data can be restored to ANY point in time.

Provides Continuity Options: With Metrofile Cloud M365, you can retain dynamic data, including those of ex-employees, even when their associated M365 account is deleted. It empowers you to access and restore historic data as needed, and even provide new employees with their predecessor's old emails to maximize job efficiency.

Legal Protection: Metrofile Cloud Microsoft365 Backup optionally includes an enterprise-grade functionality that ensures an organisation always has access to a "tamper-proof" copy of M365 documents for legal reasons.

Key Features

- **Automatic Protection:** Streamline your backup management for Microsoft365. New users, groups, and sites are automatically protected.
- **Simplified Administration:** Implement and manage the solution and perform backup tasks using an intuitive management portal.
- **Multi-Level Encryption:** At-source, enterprise-grade AES-256 encryption safeguards your backups with irreversibly encrypted passwords.
- **Powerful Status Monitoring:** Advanced reporting capabilities for higher transparency and security, including widgets, notifications, alerts for critical events.
- **Multi-Factor Authentication Support:** Enhanced security with Microsoft's Multi-Factor Authentication (MFA).
